

Poly Foil Batts

Solarwise Poly Foil Batts combine the benefits of reflective foil with bulk insulation. The polyester batt, like all bulk insulation reduces the flow of heat, while the reflective foil layer works to reflect heat away from the ceiling. Thus ensuring your home is much cooler in summer and much warmer in winter.

The Poly Foil Batts fit tightly between ceiling joists (with the foil layer facing down) and sit on top of the spacer provided to ensure maximum efficiency of the reflective foil. They can be easily installed by you or our qualified installers, if you prefer.

Once installed correctly, our Poly Foil Batts can significantly reduce energy usage by up to 45%.

Our Poly Foil Batts meet the Australian Standard AS2627 for thermal insulation and when tested to the Australian Standard AS 1530 for Fire Safety, were found to have an excellent early fire hazard rating.

AVAILABLE FROM:

R-Value (Thermal Performance)	Application/Use	Sizes
R 2.5 Ceiling Batts	Suited to most ceiling requirements.	430mm and 580mm wide
R 3.0 Ceiling Batts	Recommended for most climate conditions	430mm and 580mm wide
R 3.5 Ceiling Batts	Designed for extra performance	430mm and 580mm wide
