Spinaway MkII

Spins away damp

Spins away heat

Spin heat and damp from your home all year round. The Spinaway MkII ventilation system is effective all year-round, removing hot and moisture-laden air from roof cavities and replacing summer heat and winter damp with fresh air.

Winter Damp

Up to 12 litres of moisture finds its way into your roof cavity every day from bathrooms, laundries and kitchens. This trapped moisture can promote mould, mildew, rot, odours and peeling paintwork.

The Spinaway MkII is the perfect solution as it will help to eradicate this problem and therefore save you money.

Summer Heat

Temperatures in your roof can reach up to 60°C, which effectively raises the room temperature in your home. This problem places a greater load on air conditioning and therefore increases your power bill.

High Quality Product

The Spinaway MkII comes complete with a 300mm throat diameter, turbine ventilator and base flashing to give you a simple, reliable and efficient way to ventilate your home with fresh air all year round. *It comes with 2 high quality, precision bearings, ensuring the system has a quieter operation. The Spinaway MkII is so reliable that it comes with a 15 year warranty.*

Spinaway MkII is Australian Made from non-rust aluminium alloy. The unit is available in *Mill Finish* or a range of powder coated colours as listed below:

Armour Grey, Birch, Bowral Brown, Caulfield Green, Ebony, Gull Grey, Heritage Red, Merino, Mist Green, Mountain Blue, Off White, Pale Teracotta, Rivergum, Slate Grey, Smooth Cream, Stone, Torres Blue, Tuscan Red and Wheat.

The Spinaway MkII has been tested and complies with AS2428.1-1993 to wind speeds up to 200km/h and to the entry of wind driven rain at a rate of 2.5 L/sec under cyclonic conditions.

Saves Money

By minimising heat and moisture not only will you save on energy costs but maintenance costs will be reduced, as the structure of the home will be better preserved. Also by removing moist air, the Spinaway MkII helps to maintain ceiling insulation

in a dry condition which once again results in savings on heating and cooling costs.

No Running Costs

The Spinaway MkII is powered by the wind so there are no on-going running costs. Even in light winds, specially designed vanes catch every passing breeze.

Easy to Install

The Spinaway MkII has a variable pitch base, so it fits all tile, metal and fibre cement roofs with pitches up to 45°. The Spinaway MkII can be easily installed following the instructions, which come with the unit. Special fixings required for cyclonic areas.

How many Spinaway MkII's do you need?

House size	No. of units
90 - 110 square metres	1
160 - 180 square metres	2
220 - 270 square metres	3
